

Group SMS + Forward SMS & MMS **All 4 one SMS / One SMS 4 All + Forward**

Help and Usage

About & Features

▶ **Features:**

- ▶ Easy to use interface
- ▶ Create and manage multiple SMS, MMS and EMAIL groups from your contacts.
- ▶ Send new SMS/MMS/EMAIL to groups & selected contacts.
- ▶ Forward inbox/sent SMS and MMS to your groups with attached picture (only Images supported by Android).

Create & Manage Groups - 1

Click to create a new group

Click on type of group (sms/mms) or email

Select the numbers you want in group. Enter a name and "Back" to save group. Same process for email groups also

Contact Groups - Manage Groups

Forward Groups Phone E Mail

New Edit

Select Group Type

What group you want to Create ?

CLEAR CONFIG HELP CLOSE

Create & Manage Groups - 2

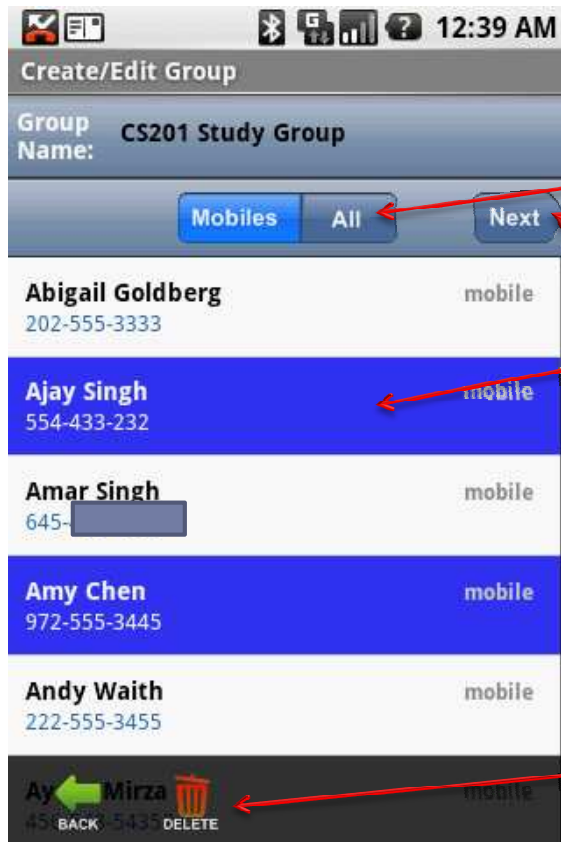

Group Saved

Click on Edit sub menu, which turns the group names to red. Now touch group name to edit

Create & Manage Groups - 3

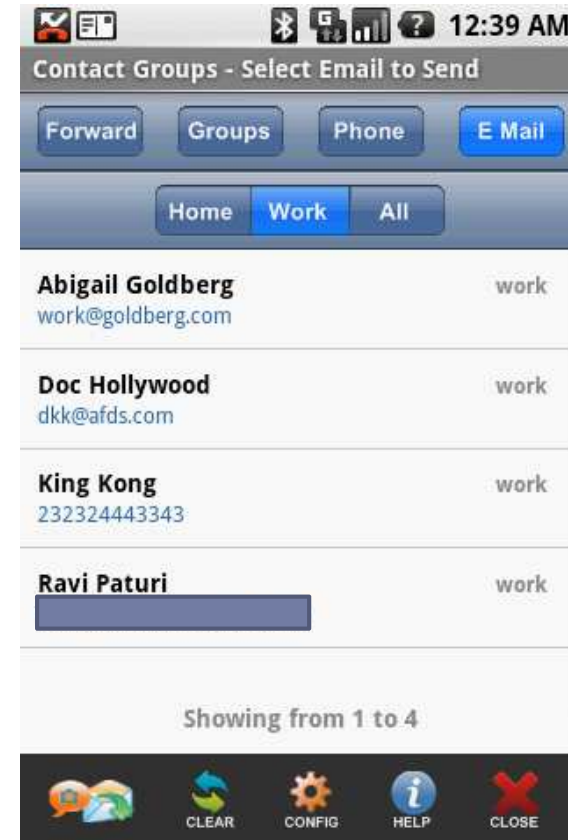

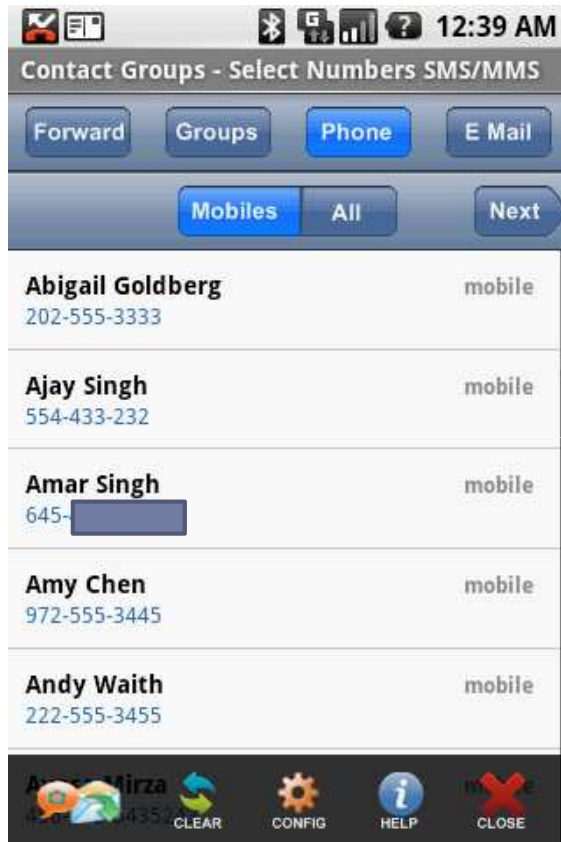

Group Edit mode, you can select and deselect entries. To improve performance only 50 phone numbers shown, you can click next to see others (or All to see all numbers). Any selections will be preserved even when you go to other screens during edit.

Delete a group

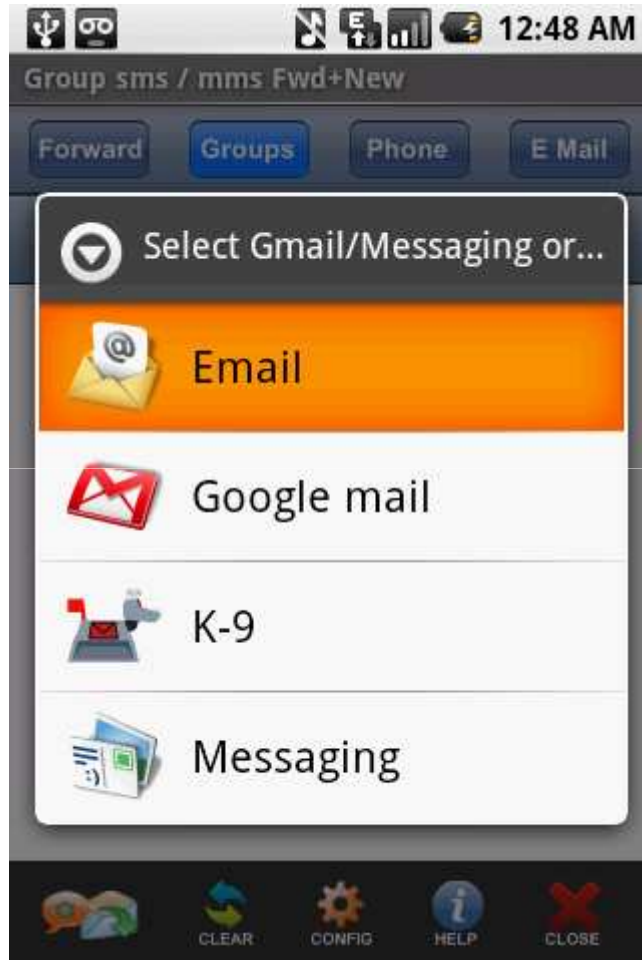

Sending New SMS/MMS

Phone and Email screens shown, for SMS/MMS select the numbers you want and click on sms/mms/email icon to start new SMS/MMS to the selected numbers. For email select desired emails and click on the sms/mms/email icon.

Choose the right App

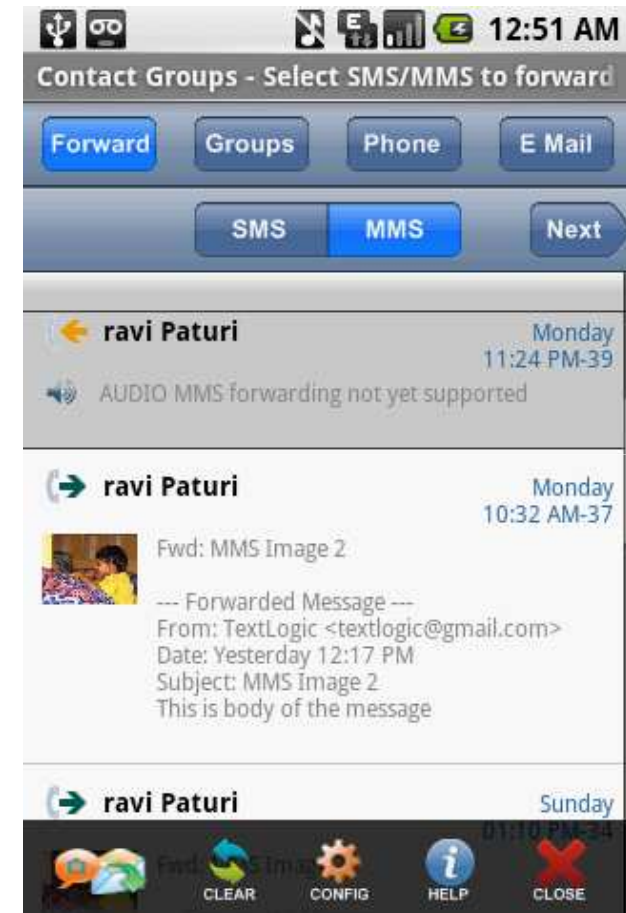

Next step is to select correct application. If you selected emails, then select “Google Mail” or K-9 if you have on your phone. (Tested with Both – did not work with Email application)

If you selected phone numbers and want to send sms/mms select Messaging.

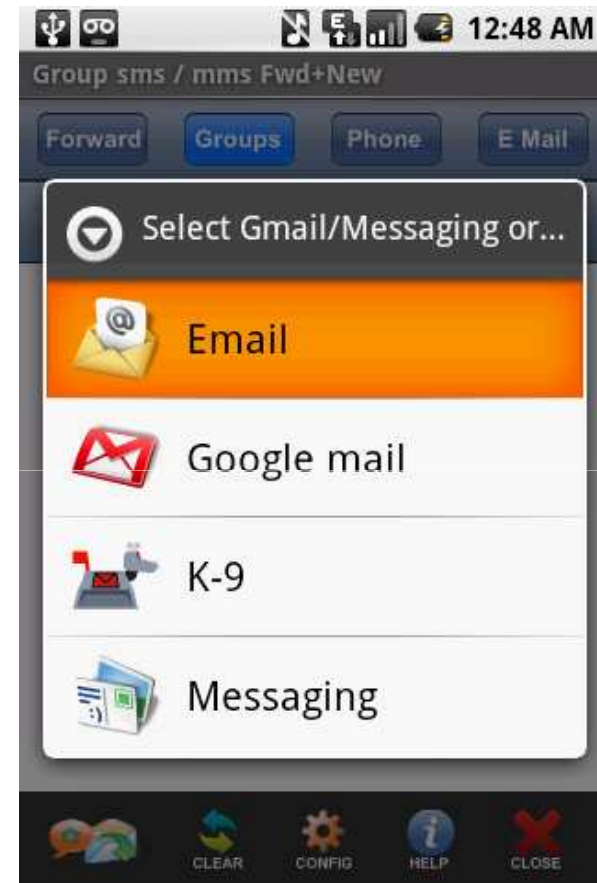

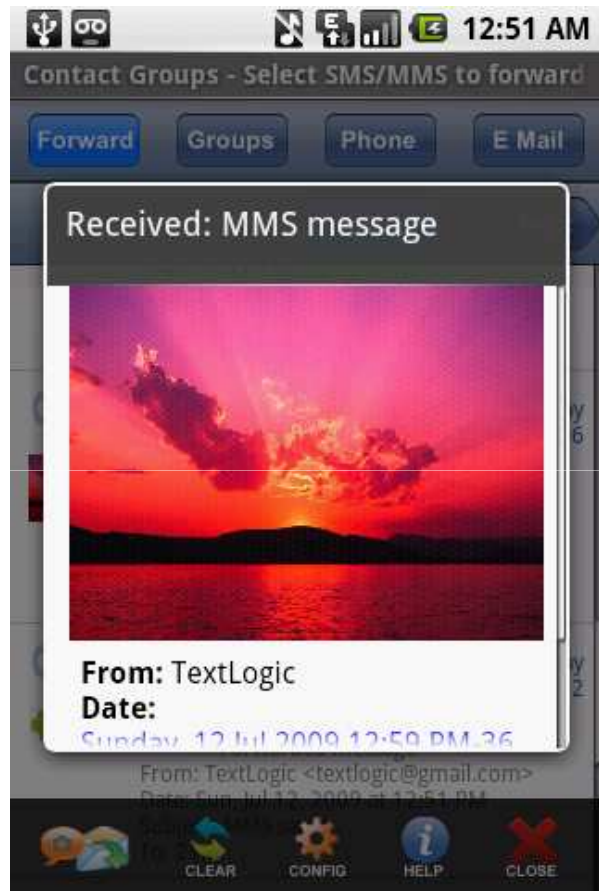

Remember, you can select Groups and individual entries at the same time, each number or email will be used only once if there is an overlap between group members and adhoc selected entries.

SMS and MMS Logs and Selection for forwarding - 1

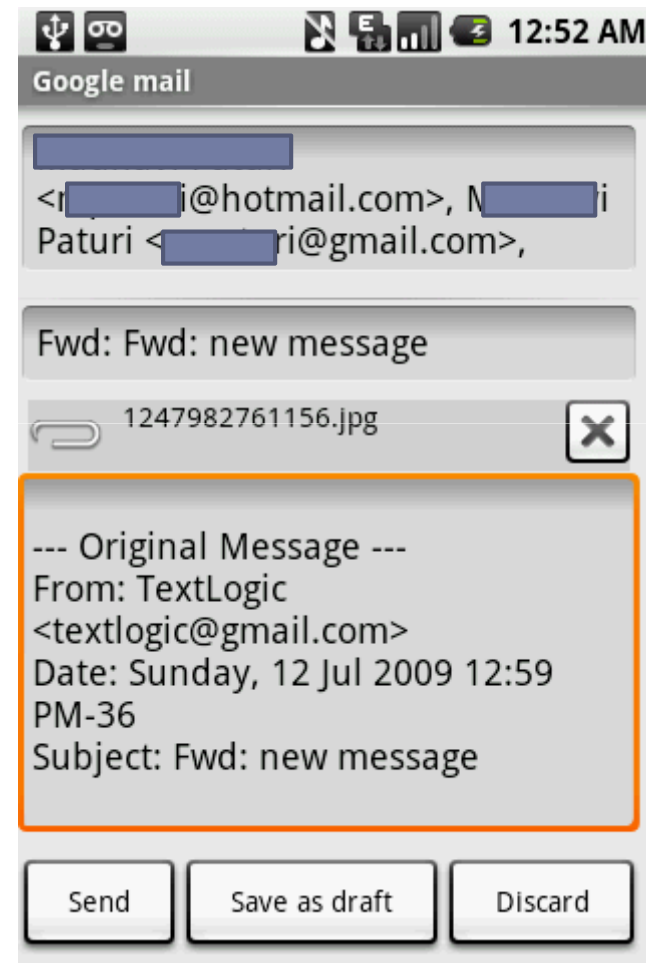

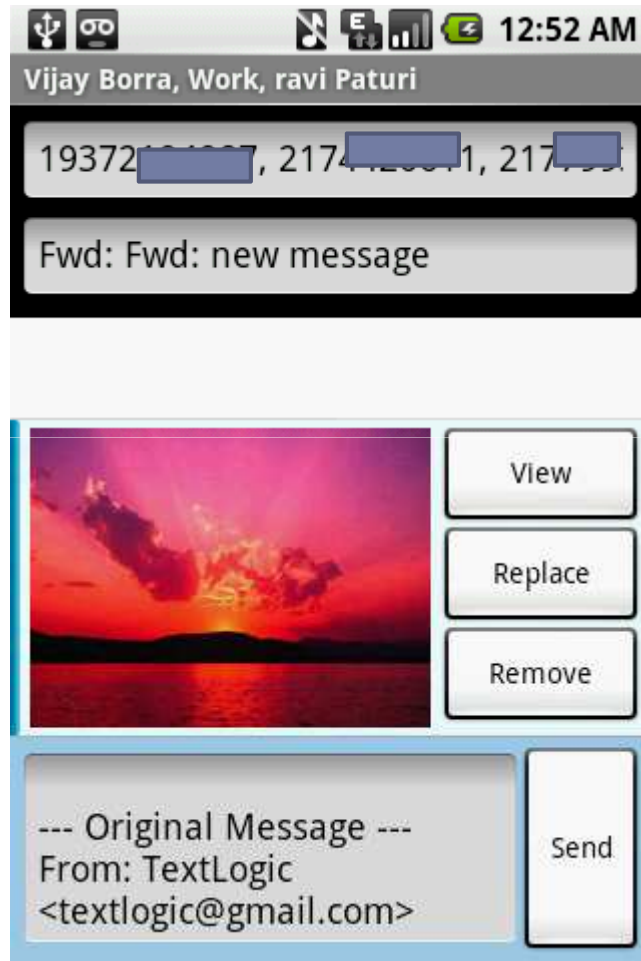

Just touch sms or mms to select for forward. Incoming and Sent messages are indicated by the icon next to each entry. Long click on an entry to see full details.

SMS and MMS Logs and Selection for forwarding - 2

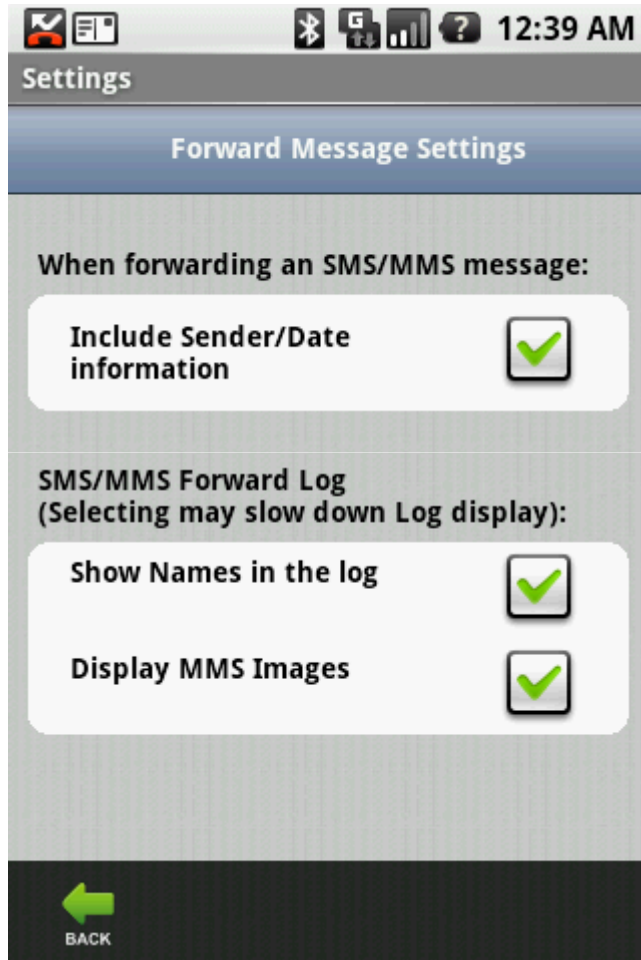

Long Click will display the full details of message. Once you selected message click on sms/mms/email icon on left bottom to select proper app (same process as creating new)

Now you are ready to forward

Configuration Screen

By selecting “Include Sender/Date” will format the message adding sent by (or received by), date it sent/received, along with a separator “--- original message—

If not selected it will send as if you are sending it first time. Of course either case you can edit the message before it goes out.

Log options: Since the Log creation process involves creating thumbnails and contact lookup, it could be slow but useful. If you want to speed it up uncheck these.

Log display is a back end process so even if takes 2-3 seconds app will not crash – you will see a loading message as it loads.

Feedback & Disclaimers

- ▶ Please send any feedback or bugs to textlogic@gmail.com
- ▶ Our Promise: If any bugs found or Notified, they will be fixed with in 2 weeks and a new version will be made available free of cost.
- ▶ Disclaimers
